INTRODUCTION

HEALTH TRAFFIC LIGHTS www.nhsgrampian.org

Health Traffic Lights 2015 provide a colour-coded picture of health and ill health in our communities alongside population indicators. They make it easier to see – at a glance- issues that may need to be addressed. These Health Traffic Lights are available for each of the three local authority areas and also by each postcode sector. Maps of postcode sectors are included.

WHAT AND WHO ARE HEALTH TRAFFIC LIGHTS FOR?

Health Traffic Lights have been designed to:

- Illustrate health status for every postcode in Grampian and by Health & Social Care Partnership
- Make it easier for everyone to understand health information
- Provide health and social care colleagues with a systematic, structured tool
- Make it easier to see differences between communities
- Support elected members in their work
- Provide a starting point for monitoring health issues in communities
- Flag issues that need to be investigated further
- Help localities to pinpoint areas and issues for action
- Assist Community Planning Partners, Health and Social Care Partnerships and Integrated Joint Boards to improve health and reduce inequalities
- Orientate people new to Grampian or 'new' to health
- Help everyone to contribute to reducing inequalities to transform our communities.

HOW DO THESE TRAFFIC LIGHTS WORK?

The Traffic Lights take each indicator and compare it to the Scotland average. For ease, health indicators are grouped together and themed and population indicators are grouped together and themed. A colour code is assigned as follows:

Health Indicators – Traffic Lights

Red - more than 5% **worse** than Scotland average

Green – more than 5% **better** than Scotland average

Amber – **within** + or – 5% of Scotland average

Population Indicators – Blue Lights

For some indicators, being different to the Scotland average doesn't mean being 'worse' or 'better', but it might still be useful information – e.g. it may help to know that the community has a higher percentage of elderly in the population.

For these indicators, we have assigned Blue Lights as follows:

Light blue – more than 5% **less than** Scotland average

Dark blue – more than 5% **more than** Scotland average

Mid blue – **within** + or – 5% of Scotland average

'Blank' means data not available.

The Health Traffic Lights are based on data available from the Health and Wellbeing Profiles.

The colour coding, makes it much easier to see 'at a glance' the issues that may need to be addressed in Grampian.

WHERE DID THE INFORMATION COME FROM?

The Health Traffic Lights take information from the Scottish Public Health Observatory (ScotPHO) Health and Wellbeing Profiles 2015 <http://www.scotpho.org.uk/>. The profiles use a range of indicators - e.g. early deaths from cancer - at Intermediate Zones (IZ). More detail is available in the technical report at www.scotpho.org.uk/profiles

Intermediate Zones are aggregations of data zones, and contain between 2500 and 6000 people. The data zone is the key small-area statistical geography in Scotland, and is used in the Scottish Index of Multiple Deprivation (SIMD).

For Health Traffic Lights, data has been aggregated to postcode sector to ensure maximum meaningful access for health and social care colleagues and Grampian citizens, as the postcode is arguably the most recognisable unit.

POSTCODE SECTORS

A Health Traffic Lights report is available for each 5 digit postcode area in Grampian.

- Each postcode area report shows information for the Intermediate Zones contained within the area.
- The percentage of people from the area that live in the Intermediate Zone is shown in brackets. (For example 85.1% of postcode sector AB10 1 lives in IZ018).

This allows users to assess which Intermediate Zones contribute most to the picture of health in that postcode sector. Maps of the postcode sectors in NHS Grampian area are available at Appendix 1.

INTERPRETING HEALTH TRAFFIC LIGHTS

These traffic lights illustrate a range of health indicators for intermediate zones within a postcode sector.

For example, using postcode zone AB10 1, the traffic lights show the 4 most important intermediate zones which make up the postcode AB10 1, along with the proportion of the population in AB10 1 that live in each of these zones.

Looking along the top of the traffic lights we can see that IZ018 makes up the largest percentage. The column for IZ018 is mainly red. This relates to the **overall** performance for IZ018, **not** to the postcode AB10 1.

Some of this population (14.9 %) do not live in AB10 1, but clearly as 85.1% do, it would be an appropriate proxy; for the largest population component of the postcode sector, the majority of that area would be red.

Where a traffic light has a more even split e.g. 4 equal zones of 25%, 3 of 33% etc., it would not be appropriate to assume the colours in each column **are representative of that postcode sector** as a whole.

For information on the development of the Health Traffic Lights tool, please contact:

Appendix 3: Health Indicators: Definitions and Sources

Indicator	Description	Definition	Time Period	Source
1-2	Life expectancy	Estimated average male and female life expectancy at birth in years (using Chiang (II) method).	2009-13	NRS
3-6	Deaths	Deaths from all causes (all ages), younger ages (16-44 years), cancer (under 75s), CHD (under 75s); 3-year average directly age-sex standardised rate per 100,000 population per year.	2011-13	NRS
9	Alcohol related and attributable hospital patients	No. of patients discharged from hospital (annually) with alcohol related and attributable conditions: 3-year average directly age-sex standardised rate per 100,000 population per year.	2013/14	ISD Scotland (SMR1/01, Linked Database)
10	Alcohol related deaths	Deaths from alcohol related causes (all ages): 3-year average directly age-sex standardised rate per 100,000 population per year.	2011-13	NRS
11	Drug related hospital patients	Patients discharged from hospital with drug related conditions: 3-year average directly age-sex standardised rate per 100,000 population per year.	2011-13	ISD Scotland (SMR1/01, Linked Database)
13	Patients registered with cancer	Patients registered with cancer expressed 3-year average directly age-sex standardised rate per 100,000 population per year.	2011-13	ISD Scotland, Scottish Cancer Registry (SMR06)
14-18	Hospitalised patients	Patients discharged from hospital (annually) in particular circumstances and for specific conditions (COPD, heart disease, asthma, emergency admission, and multiple admission 65+, 3-year average directly age-sex standardised rate per 100,000 population per year.	2011-13	ISD Scotland (SMR1/01, Linked Database)
19	Road traffic accident casualties - all ages	Patients discharged from hospital (annually) after a road traffic accident emergency admission, expressed as 3-year average directly age-sex standardised rate per 100,000 population per year.	2011-13	ISD Scotland Statistics
21	Psychiatric hospital patients	People discharged from psychiatric hospitals during the 3-year period as a directly age-sex standardised rate per 100,000 population per year.	2011-13	ISD Scotland (SMR04)
22	Deaths from suicide	A suicide is defined as a death resulting from intentional self-harm or undetermined intent. This indicator is expressed as a five-year EASR per 100,000 population.	2009-13	NRS
23	Adult claiming IB/SDA/ESA	No. and percentage of all adults aged 16+ claiming incapacity benefit/severe disability allowance (SDA) or employment and support allowance (ESA).	2013 (Quarter ending May)	DWP/SNS
46	Teenage pregnancies	Teenage pregnancies as a three-year average crude rate per 1,000 females aged 15-19.	2010-12	NRS/ISD
47	Smoking during pregnancy	Women recorded as a "current smoker" at antenatal booking appointment, expressed as a 3-year percentage of all women attending booking appointments.	2011-13	ISD Scotland (SMR02)
48	Low weight live births	Low weight live full-term singleton births (<2500g), expressed as a 3-year percentage of all live singleton births.	2011-13	ISD Scotland (SMR02)
49	Babies breast-fed at 6-8 weeks	This indicator shows percentage of babies reported by parent as being exclusively breastfed at 6-8 week review	2011-13	CHSP-PS
50	Dental health in P1	Primary 1 children receiving a "Category C" letter from Basic Inspection ("No obvious decay experience, but child should continue to see the family dentist on a regular basis.") - percentage of all Primary 1 children.	2013/14 (school year)	NDIP Basic Inspection
51	Dental health in P7	Primary 7 children receiving a "Category C" letter from Basic Inspection ("No obvious decay experience, but child should continue to see the family dentist on a regular basis.") - percentage of all Primary 7 children.	2013/14 (school year)	NDIP Basic Inspection
52	Child obesity in P1	This indicator shows the percentage of Primary 1 children whose BMI is within the top 5% of the 1990 UK reference range for their age and sex.	2013/14 (school year)	CHSP-S
53	Breast Screening Uptake	Breast screening uptake for all eligible women aged 50-70 (routine appointments): 3-year average percentage.	2010-12	ATOS (SBSP)
54	Bowel Screening Uptake	This indicator shows bowel screening uptake for all eligible men and women invited (aged 50-74 years) as a three-year rolling percentage.	2010-12	ATOS (SBSP)
55-56	Immunisation uptake	Immunisation uptake at 24 months for Diphtheria, Pertussis, Tetanus, Polio, Hib, and – separately – MMR (measles, mumps and rubella), expressed as a 3-year percentage of children of this age.	2012-14	SIRS

Appendix 3: Population Indicators: Definitions and Sources

Indicator	Description	Definition	Time Period	Source
-8,-7,-5,-4	Population	Percentage of total population in each age band (0-15 yrs; 16-64; 65-74;75+) (From Health Intelligence, NOT ScotPHO Profiles)	2014	NRS
-1	Live births	Annual live births expressed as a rate per 1,000 population. (From Health Intelligence, NOT ScotPHO Profiles)	2010-14	NRS
26	Single adult dwellings	Percentage of dwellings subject to Council Tax discount of 25%	2013	NRS
27	Average tariff score – S4	Average tariff score (pupil attainment) of all pupils enrolled in stage S4 of publicly funded secondary schools. *	2012/13 (school year)	SNS/SG
28	Primary school attendance	Primary school attendance rate - percentage of all pupils (based on pupil residence).	2010/11 (school year)	SG via SNS
29	Secondary school attendance	Secondary school attendance rate - percentage of all pupils (based on pupil residence).	2010/11 (school year)	SG via SNS
31	Income deprived	Adults defined as “income deprived” expressed as a percentage of the total population.	2013	SIMD2012, SG
32	Employment derived	Adults defined as “employment deprived” expressed as a percentage of the working age population (16-64male,16-59female).	2013	SIMD2012, SG
33	Working age population claiming Out of Work benefits	This indicator shows percentage of working age population (defined here as 16-64 year olds) claiming ‘key out of work benefits’.	20103(quarter ending May)	DWP
35	Child living in poverty	Percentage of dependent children under the age of 20 in families that receive Child Tax Credits (<60% median income) or Income Support/ Jobseeker's Allowance.	Snapshot on 31/8/2012	HMRC
36	Population 60+ claiming pension credit	Percentage of population aged 60+ claiming pension credit.	2013 (quarter ending May)	DWP
37	Crime	Crimes rate per 1,000 population (based on SIMD crimes of violence; drug offences; domestic house breaking; minor assault; and vandalism).	2013	SIMD2012, SG
43	Population within 500m derelict site	Percentage of total population living within 500 metres of a derelict site.	2013	SVDLS/SNS
44.	People living in 15% most “access deprived” areas	Percentage of total population living in 15% most “access deprived” areas (data zones) in Scotland	2013	SIMD 2012, SG
